DESCRIPTION

This is the add-on option for some of the metal furniture which we offer as standard in the polished stainless steel. While not all our furniture offerings lend themselves to receiving an alternate finish, many do.

The finishes here are all high-strength polyester powder coat. They are all suitable for exterior use, which means they are UV light stable and will not rust or chip. (Note, that while the frame may be placed outside, the foam and leather don't do well in the rain.)

Prefer a different color like hot pink or baby blue, we can usually find the color at our powder coater supplier. Just send us a note.

This add on option is available in two size options and is added per item. Select size "Small" for the metal legs used on benches, daybeds, and Saarinen chairs, or size "Large" for all other chairs, loveseats, and sofas. If you're purchasing something that is sold as a set (i.e. a Womb chair and ottoman) you only need to add the custom metal finish option "Large" to your cart once.

STANDARD FINISH CHOICES

For many of the frames, we offer 8 standard metal finishes colors besides the polished stainless steel. This is the add-on option for some of the metal furniture which we offer as standard in the polished stainless steel. While not all our furniture offerings lend themselves to receiving an alternate finish, many do. The finishes here are all high-strength polyester powder coat. They are all suitable for exterior use, which means they are UV light stable and will not rust or chip.
