

Floor Stand Safety Pod

Automatic Hands-Free Sanitizer Dispenser with Stand

Item No.: SW-D20

Dispenser Colors:

DESCRIPTION

The SW-D20 Automatic Hands-Free Sanitizer Dispenser with Stand is the perfect solution for busy lobbies, building entries and waiting rooms and general areas where a hand sanitizing station may be required. For a clean, modern professional look.

Our dispenser model is designed for use with either liquid or gel sanitizers. The modular built-in sanitizer bottle holds up to 1 liter of liquid which requires less frequent refills. Because of its automatic, hands-free no-touch design it is more hygienic than standard hand pump dispensers. You can specify the number of 0.4 mL sanitizer doses (2, 3 or 4 squirts) during dispenser set up. After a dispensing cycle, the pump mechanism always returns to the home position and provides a positive seal with no leaks.

Whats Included:

One Dispenser (choice of black or white)
Matching Floor stand with a heavy-duty base
Drip Tray to catch soap or sanitizer so your floors remain clean.

Main Features:

Automatic, hands-free, no-touch operation
Use your own bulk liquid or gel hand sanitizers and soaps - no need for special cartridges or refill pouches.
Heavy-duty plastic construction (choice of white or black)
Large window clearly shows remaining liquid in bottle
Removable actuating mechanism assembly
Requires (4) C batteries (not included)

Includes lock and key for added security
ADA compliant in force and one-handed operation

Dimensions:

Dispenser: 6 x 11 x 4 inches

Floor Stand: 18 x 36 inches

Some assembly required.

Please specify White (SW-D20-01) or Black (SW-D20-09) unit.
